Administration
Washington D. C. 20.545

Dear Dr. Bruner:

It has been one month from your last letter and many important things has happened in our country. It has finished one historical period and we are starting a new one. In many things Spain has advanced a lot; I hope we will not loose now anything and little by little we could arrive at the same level of the other occidental states. I thank you very much for your words about the Generalisimo and his fight against death.

As you will know Phil Dean found the lung counter in perfect conditions. We will start the counting of the JEN staff people the 8th of January, and then I will go to Palomares to see how I can arrange to count that people again.

In January I will try to solve also the problem related with the high counting you measured there in your last trip.

Phil Dean has explained us your proposal. I am sorry you will be not one of the three man of your Committee of relations for the Indalo Project in the future. We talked with our President and the Director General, Mr. Pascual, and they don't find any problem in some relations with the LLL. Mr. Pascual want you send us your proposal in relation with it.

I send you the description of the work we propose for the next year and the budget we will need to do it. I hope this will satisfy you and ERDA.

Everything is within the Otero-Hall agreement.

My best regards. Sincerely yours

Emilio Inanzo
